## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 14, and 23 are allowed. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 14, and 23, Lee (U.S. Patent No. 6,006,094), the closest prior art, teaches a method for providing real-time communication to a subscriber outside a home system in a communication network, wherein the communication network includes the home system and a roaming system (Fig. 3; Col. 6, lines 43-46), the method comprising the steps of: providing access to a home switch located in the home system; providing access to a roaming switch located in the roaming system; providing access to a trunk operatively connecting the home switch to the roaming switch (Col. 3, lines 38-67; Col. 4, lines 1-31; Col. 6, lines 1-63).

However, Lee fails to anticipate or render obvious the steps of providing the subscriber with a universal address that can be mapped to one or more addresses of the subscriber; storing the universal address in a database operatively connected to the home switch and the roaming switch; providing the subscriber with a local mobile station having a local roaming address code within the roaming system; updating the universal address to map to the local address code; and allowing the subscriber to receive incoming calls from the universal address within the roaming system through the local mobile station without incurring roaming charges.

Claims 2-13 depend on claim 1. Therefore, they are allowable.

Claims 15-22 depend on claim 14. Therefore, they are allowable.

Claims 24-31 depend on claim 23. Therefore, they are allowable.
